

## **Cyber Law LAWS8077 – Reflective posts**

### **AT1 Three Blog Posts - 30%**

**A note about the three due dates:** Please note that the due dates for Blog Posts 1 and 2 are recommended, but not strict. For Blog Post 3, the due date is strict. You need to submit all three Blog Posts by 29 April 2022 at the latest. If you are going to be late submitting your three Blog Posts, you will need to seek an extension in order to avoid a penalty.

**A note about content:** All blog posts should contain at least two cited sources. These do not have to be from academic peer-reviewed sources as the aim is for these posts to be reflective i.e. this is not a research task. Given the nature of task hyperlinks can be used to refer to sources.

The idea is that each blog should correspond to an area covered in a seminar with one blog per week required. You may reflect on content provided in the seminars, on other content that the seminar triggered your interest in which is connected to the content covered even if not expressly mentioned, or you may want to blog in relation to something that will find its way into your Research Essays. If you are blogging about something that will find its way into your research essay please ensure that you are familiar with the [rules](#) relating to plagiarism and academic integrity.

#### **Assessment Criteria:**

- a) Understanding of the Issues
  - Addresses the topic of the reflective post in a manner demonstrating an understanding of the important points
  - Evidence of close consideration of the materials drawn on
  - Issues raised by the reflection are clearly and concisely identified
  - Material chosen relates clearly to the topic and is analysed not just summarised or quoted extensively
- b) Communication & Development of Argument
  - Clear theme or argument
  - Presented in a logical and well-organised manner
  - Ideas/paragraphs linked coherently
- c) Argument/Analysis
  - Originality of reflection and critical analysis of the material chosen
  - Complexity and insight in dealing with theory/ideas
  - Suggestions for change where appropriate
  - Interdisciplinary perspective, where appropriate
  - Addressing opposing arguments
  - Well-reasoned conclusions
- d) Presentation, style and referencing
  - Good use of structure, section headings and paragraphs
  - Clarity and conciseness of expression, interesting and engaging of reader

- Use of appropriate terminology and correct grammar, syntax and spelling
- Adherence to word limit
